2	1.0	Introduction
5	2.0	Access By Mode – Alternative Transport Accessibility
15	3.0	Collection of Baseline Information
16	4.0	The Travel Plan
22	5.0	Implementing the Plan
24	6.0	Conclusions

1.0 INTRODUCTION

- 1.1 NRB Consulting Engineers have been commissioned to prepare a Travel Plan in support of a 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9 sq m); 2 No. café/restaurant units (totalling 428.4 sq m) and 1 No. retail unit (156.0 sq m).
- 1.2 The development consists of a mixed-use development, the first development of the proposed new Urban Quarter in Galway Harbour. The scheme consists of a LRD and community development comprising 356 no. apartment units (over 4 blocks).
- 1.3 The Galway City Development Plan notes – “*Mobility management aims to reduce the demand for the use of cars by increasing the attractiveness and practicality of sustainable transport such as public transport, walking and cycling*”.
- 1.4 Whilst it is widely accepted that an MMP is best prepared at development occupation, particularly for residential schemes which allow targets to be set based on the resident profile, the basis of the Report does provide a structure for the Management Company & the appointed Mobility Management Plan Co-Ordinator to follow from occupation. Once the resident’s profile is known, the travel habits and travel choices can then be best monitored & influenced. Modal shift targets will be set and included when a working MMP is in place.
- 1.5 This report has been prepared in order to explain the developer’s commitment to the promotion of more sustainable and cost effective travel habits among the end occupiers/residents of the scheme. In this case, this is supported by significantly reduced provision of car parking for the development and enhanced bicycle parking accommodated.

What is a Travel Plan?

- 1.6 Travel Plans, originally and elsewhere called Mobility Management Plans (MMPs), they originated in the United States and the Netherlands in the late 1980s. In the US, employers over a certain size (generally over 100 employees) were required to implement 'Trip Reduction Plans' in order to reduce single-occupancy car commuting trips, and to increase car occupancy.
- 1.7 A MMP or Travel Plan (TP) consists of a package of measures put in place to encourage and support more sustainable travel patterns. Such a plan usually concentrates on work and school commuting patterns. In essence, a TP is useful not only to reduce the attractiveness of private car use, but also for the ability to promote and support the use of more sustainable transport modes such as walking, cycling, shared transport and mass transit such as buses and trains.
- 1.8 In this case, for a development at planning stage where no residents are in place or identifiable, a TP or MMP can only set out and identify the range of measures that could be put in place, and assist in identifying the quality of alternative modes of travel that may be available to residents, in the event of construction and occupation of the apartments.

Aims and Objectives of this Travel Plan

- 1.9 The package generally includes measures to promote and improve the attractiveness of using public transport, cycling, walking, car sharing, flexible working or a combination of these as alternatives to single-occupancy car journeys to work. A TP can consider all travel associated with the residential or work site, including business travel, fleet management, customer access and deliveries.
- 1.10 It should be considered as a dynamic process where a package of measures and campaigns are identified, piloted and monitored on an on-going basis. This TP supports the reduced provision of car parking and higher cycle parking space numbers at the subject development.
- 1.11 The changes which are being sought as part of any plan may be as simple as car sharing one-day per week, or walking on Wednesdays, or taking the bus on days which do not conflict with other commitments, leisure or work activities.
- 1.12 This plan assists by identifying the range of measures that could be put in place, and assists in identifying the quality of alternative modes of travel that may be available to residents, in the event of construction and occupation of the apartments.
- 1.13 It is envisaged that once in place, the Travel Plan will enable the following benefits to be realised for the Development:
 - Reduced car parking demand and reduced congestion on the local road network due to lower demand for private car transport and/or more efficient use of private motor vehicles,
 - Improved safety for cyclists and pedestrians,
 - Direct financial savings for those taking part in the developed initiatives, through higher than average vehicle occupancy rates,
 - A reduction in car parking and car set-down demand, resulting in improved operational efficiency and safety for all,
 - Improved social networking between all those participating in the shared initiatives,
 - Improved environmental consideration and performance,
 - Improved public image for the development, which sets an example to the broader community and may lead to residents and staff making better travel decisions in the future,
 - Improved health and well-being for those using active non-car transport modes,
 - Regular liaison with the Local Authority and public transport providers to maintain, improve, and support transportation services to and from the site,
 - Improved attractiveness of the development to prospective residents and staff,
 - Optimal levels of safety for all residents, staff and visitors.

Methodology

- 1.14 As part of this Travel Plan, reference has been made to the following documents:
- Your Step By Step Guide To Travel Plans (NTA 2012);
 - Achieving Effective Workplace Travel Plans (NTA 2011);
 - Traffic and Transport Assessment Guidelines (TII);
 - Traffic Management Guidelines (DoELG, 2003);
 - Mobility Management Plans – DTO Advice Note (DTO, 2002);
 - The Route to Sustainable Commuting (DTO 2001);
 - Smarter Travel: A Sustainable Transport Future (DOT)
- 1.15 Consultation with key stakeholders is an essential part of any Travel plan. As discussed below, as part of the operational phase of this development, a Travel Plan Coordinator Role will be appointed from within the Building Management Company. Following on, once occupied, Residents and staff will be asked to complete detailed questionnaires on essential data in relation to their existing travel patterns. This information will be used to inform the ongoing implementation, monitoring and review of the plan for this development.
- 1.16 This information has been used herein as the basis for the assessment, conclusions and recommendations.

2.0 ACCESS BY MODE – ALTERNATIVE TRANSPORT ACCESSIBILITY

- 2.1 The development consists of the construction of a 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9 sq m); 2 No. café/restaurant units (totalling 428.4 sq m) and 1 No. retail unit (156.0 sq m) at Lough Atalia Road, Galway Port, Galway City. It is ideally located with access to alternative modes of sustainable travel. The development is provided with generous secure off street parking areas for bicycles, and a limited number of private car parking spaces (with associated site works and services).
- 2.2 The mixed-use development primarily comprises: 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9 sq m); 2 No. café/restaurant units (totalling 428.4 sq m) and 1 No. retail unit (156.0 sq m). The development has a total floor area of 32,096.0 sq m and is primarily proposed in 4 No. blocks (identified as A–D) that generally range in height from 6 No. to 13 No. storeys. The vehicular access arrangement is by way of an upgraded priority junction on the Lough Atalia Road, with a new link road provided to the north of the development site.
- 2.3 Of course, an MMP or TP is best prepared and implemented once a development is occupied, as travel habits and choices can then be best monitored and influenced. Once occupied, any successful Travel Plan will concentrate on journeys associated with work and school commuting patterns. These are the groups which can most practically be encouraged to use modes of transport other than the car.

Cycling and Walking Facilities

- 2.4 At present, pedestrian activity to the existing site is served by an extensive network of footpaths connecting the site to the local area and providing direct links to the high-quality public transport services locally and within the wider area.
- 2.5 The City Development Plan sets an ambitious target to create a 15-minute City. It requires a more resilient city that maintains and improves the quality of the natural and built environment for the benefit of current and future generations.
- 2.6 Transport Policy 4.2 Land Use and Transportation, Point 6 states the following;

“Aim to achieve the concept of a ‘15 minute city’ where land use policies facilitate residents to access their daily needs within a 15 minute walk or bike ride and thereby reduce the dependence on car transport”.

- 2.7 The basic concept of a 15-minute city is where residents have easy access to their essential needs at distances taking no more than 15 minutes by foot or by bicycle. It is based on a network of liveable neighbourhoods and communities that offer diverse housing options, with safe access to active and public transport, local health care, education, shops, and other community infrastructure. Every resident’s 15-minute city differs due to their mobility preferences, their location, the quality of services and differing abilities to access these services.

- 2.8 An improved and consolidated development at Galway Port will assist in creating the 15 Minute City to match the vision outlined in the City Development Plan.
- 2.9 The site is within a 5-10min walk of Galway City Centre, benefitting from a host of services and amenities, as well as employment opportunities. Most of Galway City Centre, as defined in Figure 11.32 of the GCDP is a 10-minute walk or a 5-minute cycle of the proposed site.
- 2.10 The site is within walking distance of a variety of local schools, retail premises, supermarkets, cafes/restaurants and other services which can serve residents of the development for their regular shopping/service needs. In these terms we believe that walking and cycling will represent the most popular mode of home-work-home travel for working residents of the apartments. A walking distance map is illustrated below as **Figure 2.1**.

Figure 2.1 – 15 Minute Walk Distance

- 2.11 Similar to cycle accessibility, the key to pedestrian accessibility is short, convenient and safe links. Walking is the most widely used form of transport; nearly all journeys involve some walking, therefore better pedestrian facilities can have a wide impact. There are good pedestrian linkages in the area of the proposed development. Externally, there are raised generous pedestrian footpaths, which provide linkages between the site and the surrounding area.
- 2.12 A similar illustration showing the typical cycle distance is included as **Figure 2.3** below. These illustrations are provided in order to demonstrate the sites accessibility by bicycle and on foot to a very large area of the surrounding catchment.

Figure 2.2 – 15 minute Cycle Distance

- 2.13 It is acknowledged that cyclists need to be confident that their cycles will not be tampered with. This development therefore includes copious amounts of secure enclosed accessible cycle parking spaces both within the blocks and secure external facilities, all of which are beneficially in an area subject to passive surveillance & monitored by CCTV.
- 2.14 The GCC Development Plan vision is to cultivate a cycling culture, through the implementation of appropriate infrastructure and promotional measures, which positively encourages all members of the community to cycle at all life stages and abilities as a mode of sustainable transport that delivers environmental, health and economic benefits to both the individual and the community.
- 2.15 The applicant is committed to working with Galway City Council regarding any potential upgrades to the local transport infrastructure, in particular, with regard to the upgrade of pedestrian and cycle facilities.
- 2.16 At present, there are intermittent dedicated cycle lanes/facilities on the adjacent road network, and of course, cyclists can use the existing road infrastructure. Cycling infrastructure is continually improving, and the nature of the area, along with current practices by Galway City Council (GCC) suggests that the proposed cycle network will be implemented within a short timeframe (GCC note that there are preliminary discussions regarding a future route on Lough Atalia Road). An extract from the Galway Transport Strategy showing the site in context is included below as **Figure 2.3**.

Figure 2.3 – Proposed Cycling Infrastructure (Galway Transport Strategy Fig. 7.2)

- 2.17 The plan shows that the site will be located at the intersection of a number of future routes, including new cycle facilities connecting into Eyre Square via Queen Street, which will facilitate access to the city centre. Also, the proposed Bearna to Oranmore Greenway, passing through Galway City is indicated passing via the proposed site. Therefore, the proposed site is in an ideal location to benefit from the NTA's/GCC's proposed upgrades of the city's future cycle network.
- 2.18 The key to cycle accessibility is convenient safe links, with secure and carefully sited cycle parking. Internally there are a network of safe on and off-road shared routes linking from the main access to the Cycle Parking facilities.
- 2.19 At this early stage in the development proposals, it is proposed to provide a 4.0m pedestrian / cycle path on the Lough Atalia side of the development. This proposal could form part of this future Bearna to Oranmore Greenway, as envisaged in the Galway Transport Strategy, as shown in **Figure 2.4**.
- 2.20 While the applicant is committed to working with Galway City Council regarding any potential upgrades to the local transport infrastructure, improved pedestrian and cycle access to the site are proposed via;
- A new Toucan Crossing at the Lough Atalia / Galway Port junction.
 - Provision of a wide boulevard on the Lough Atalia side of the site, which could form part of the Bearna to Oranmore Greenway.

Figure 2.4 – Potential Greenway Link

- 2.21 The applicant will also liaise with the Galway Harbour Company, in particular the proposed roads layout, as set out in the Galway Inner Harbour Draft Masterplan 2025.

Cycle Parking

- 2.22 It is expected that a significant number of residents of the proposed development will be willing to cycle to work with safe links and secure parking put in place. There are a total of 540 No residential bicycle spaces (266no. within blocks & 274no. secured externally), 186 No. for visitors and 15no. cargo spaces (Total 741). The Residential provision meets the requirements of the Design Standards for New Apartments (733 no. required with 741 provided). It is deemed that the overall level of cycle parking is of an order that will facilitate and encourage future residents to significantly uptake cycling for utility and recreational purposes, the majority enclosed within the car park and dedicated cycle stores.
- 2.23 A proportion of the cycle parking (15no. cargo spaces) will be provided for larger non-standard cycles so that they can be used by disabled people with adapted cycles and other people using tandems, child trailers, cargo bikes and tricycles. Spaces for larger cycles will be provided in the most accessible locations.

Bus Provision

- 2.24 The development is well placed to take advantage of the existing Bus services, with several stops

serviced by high frequency bus services in close proximity to the site. Bus service Numbers proximate to the site are illustrated in **Figure 2.5**.

Figure 2.5 – Existing Bus Routes in Proximity to the Site,

- 2.25 The site is close to both Galway Bus Station & Galway Coach Station (both 5-8 minute walk distance of the site, 600m), which c27no. bus routes to local and regional settlements, including Tuam. These 27 regional bus routes have c.340no. trips a day (both directions combined) connecting Galway with the local and regional towns. Accordingly, the site is well served by an established regional route network of adequate capacity.
- 2.26 The site is close to Ceannt Station (5-8 minute walk distance of the site, 600m), which accommodates 24 daily Galway–Dublin services (combined, both directions), 8 daily Galway–Limerick services (both directions), and 6 daily Galway–Athlone services. The Galway–Dublin trains also serve Oranmore, Athenry, Ballinasloe, Athlone, Tullamore, and Kildare, while Galway–Limerick services call at Gort, Ennis, and other regional stations. Accordingly, the site is well served by an established rail network of adequate capacity.

- 2.27 In addition, in terms of Future Planned Services, the NTA have recently published details of the overall bus network for the Galway. An extract from the NTA Plans showing the site location is included below as **Figure 2.6**.

Figure 2.6 – NTA BusConnects Galway City Network Plans

- 2.28 This future network shows that the site's accessibility to bus services will be further enhanced, with a high frequency and permeable service to be provided.

2.29 With the current and future planned bus services, the site is therefore clearly located within easy access to very high frequency bus services, well in excess of a 5 minute peak hour frequency.

Go Car

- 2.30 CoMoUK notes that “*shared transport, especially shared cars are vital in order to enable people to break their dependency on the private car*”. Furthermore, their research indicates that each car club vehicle can on average replace 18 private cars.
- 2.31 Existing Go Car (car club) spaces in the area at the time of writing of the Report are illustrated as **Figure 2.7** below.

Figure 2.7 – Go Car Accessibility (On Line Locator Extract)

- 2.32 However, there is a lack of shared car parking spaces located close to the proposed development.
- 2.33 A letter of commitment has been sourced from GoCar, which confirms a commitment to provide 5 no. Car Club vehicles within the proposed development. These Car Club spaces will be provided at prominent locations, denoted by road markings and signage. The future Management Company will engage with Go-Car, with a view to coordinating the commencement of the base at the site.
- 2.34 There are no standards on the minimum provision of shared car club spaces in new developments. The Compact Settlement Guidelines notes that “*the maximum car parking standards do not include bays assigned for use by a car club*”.
- 2.35 The provision of 5no. car share spaces, is the equivalent of approximately 90 no. private cars spaces.
- 2.36 In order to promote the use of the GoCar vehicles, Residents could be offered a financial contribution towards car share rental fees by the Management Company.
- 2.37 Early engagement will also be sought with the Car Club Companies to draw upon their expertise

for site specific advice (Supporting Letter already Received from GoCar).

Availability of shared Bicycles

- 2.38 Bicycle sharing facilities are becoming ever more popular with initiatives spreading ever further throughout the City. There are Galway TFI bike stations in the vicinity including nearby on Eyre Square South and Merchants Street suitable for residents. Currently, there are 195no. bikes and 23no. stations provided throughout the city.

Figure 2.8 – Galway TFI bike stations

- 2.39 However, there is a lack of shared cycle parking spaces located close to the proposed development. Therefore, it is proposed to engage with the NTA / TFI regarding the provision of a Cycle Parking Station in the Proposed Scheme / Galway Harbour Masterplan.
- 2.40 CoMoUK research notes that each shared bike can service around 10 dwellings. Therefore, with each TFI Bike Station having 20 bikes, it is the equivalent of providing bikes for 200 no. residential units.

Accessibility By Taxi

- 2.41 In terms of taxis, modern communication devices (e.g. 'FreeNow' and 'Lynk') allow taxis to be ordered on a demand-basis, without any requirement for formal taxi ranks or dedicated taxi holding areas.

Car Parking

- 2.42 Restricted Car Parking is provided, which is an effective demand management measure. Details of the justification of the parking provision are set out in the Traffic & Transportation Statement. However, it is clear that the reduced provision of car parking, with a ratio of 0.08 parking spaces

per apartment, will in itself act as a demand management measure, ensuring that the development is occupied in the most sustainable manner, being almost predominantly reliant on non-car modes of travel, reinforced through the adoption of sustainable Travel Planning Measures.

Communication

- 2.43 Prior to moving in, the Management Company will issue welcome packs to all new residents. These packs include details of the development and how it is run, advice on moving in, public transport information, useful local information, the reduced availability of parking and can require confirmation of a time-slot to move in. The preparation of this information ensures residents are familiar with the operation of the development before moving in.
- 2.44 In terms of number of transport alternatives easily available to Residents, it is considered that the proposed development is very highly sustainable in terms of public and alternative transport accessibility. The proximity of the development to existing and future improved public transport services means that all residents will have viable alternatives to the private car for accessing the site and will not be reliant upon the car as a primary mode of travel.
- 2.45 Direct and high-quality pedestrian linkages are provided between the site and the existing pedestrian facilities on the surrounding road network. The entrances to the site will be well lit, so that people can feel secure in using the facilities and can also be monitored by CCTV.
- 2.46 Public transport maps and timetables can be provided in prominent locations on site and the information will be kept up to date by the appointed Travel Plan Coordinator, a role for the Management Company.
- 2.47 Working Residents are generally now offered the opportunity to purchase public transport commuter tickets under the current 'Employer Pass' and 'TaxSaver' programmes, by individual Employers. Under these schemes the employer applies to Iarnród Éireann / Bus Éireann for tax free public transport tickets for their employees as an incentive for them to use public transport to travel to work.

3.0 COLLECTION OF BASELINE INFORMATION

Possible Travel Pattern Questionnaires

- 3.1 Once occupied, and when the Travel Plan Coordinator is appointed, the occupiers of the proposed development will be encouraged to regularly monitor the Travel Plan initiatives in order to maximise on their success.
- 3.2 Shortly after occupation of the new development, a detailed travel-questionnaire will be compiled and distributed to Residents for completion. The aim of the travel questionnaire will be to establish travel patterns between work and home and school, amongst other travel demands. The information gathered from this survey will be used to inform the further development of the Travel Plan. This will include the setting & agreeing of Modal Shift Targets for the Residents to allow continuous monitoring of the success of the MMP.
- 3.3 The Baseline Survey information allows the Travel Plan Coordinator for the development to set realistic modal-split targets for the development based on the residential profile.
- 3.4 It is anticipated that, given the location and good transport links at this development, combined with the reduced car parking on site, there will be a high percentage of use via public and alternative transport.
- 3.5 The Travel Plan will need to maintain this positive modal split and improve it, where possible. It is informative to note that the "Smarter Travel: A Sustainable Transport Future" (DOT) Objective for 2020 is to achieve a reduced work related commuting by car modal share of 65% to 45%.
- 3.6 With this in mind, the main focus of this Travel Plan will be to promote and support the use of alternative modes to the private car.

4.0 THE TRAVEL PLAN

- 4.1 The successful implementation of a Travel Plan will ensure that, in-so-far-as-possible, the impacts of this traffic are reduced and minimised where practical, while providing a number of environmental and economic advantages detailed below.
- 4.2 The following sub-sections detail the available initiatives which will serve to better manage travel demand, and therefore the traffic impact of work-related journeys, focused on the movement of residents during peak times.

Walking

Walking - Key Information	
Approx Zone of Influence	3.5km
Percentage of Residents & Staff working in area of influence	TBC in each survey when occupied
Percentage of Residents & Staff interested in Walking	TBC in each survey when occupied

Table 4.1 – Key Information: Walking

- 4.3 There are many local, global, and personal benefits to walking, a few of which are listed following:
- **W** - Wake Up! - Studies have shown that people who walk to work are more awake and find it easier to concentrate.
 - **A** - Always one step ahead - Walking makes people more aware of road safety issues and helps them develop stronger personal safety skills.
 - **L** - Less congestion - If you leave the car at home and walk, there are fewer cars on the road which makes it safer for those who walk and cycle.
 - **K** - Kinder to the environment - By leaving the car at home you are reducing the amount of CO 2 produced and helping to reduce the effects of climate change and air pollution.
 - **I** - Interpersonal skills - Walking to work or school can be a great way to meet other walkers, share the experience, and develop personal skills.
 - **N** - New adventures - Walking to work or school is a great way to learn about your local environment and community. It's also a fun way to learn about the weather, landscape, and local ecosystems.
 - **G** - Get fit and stay active - Walking to and from work or school helps people incorporate physical activity into their daily routines. Research shows that regular physical activity can benefit your body and mind.

- 4.4 Most adults will consider walking a maximum of 3.5 km (Approx 30/40 minutes) to work. Residents working within a 3.5 km radius of the site will be encouraged to walk to work as often as their schedule permits. Similarly school trips can be encouraged on foot.
- 4.5 The following initiatives and incentives can be used to encourage walking to work or school:
- Take part in a ‘Pedometer Challenge’ which is organised through the Irish Heart Foundation or Smarter Travel Workplaces;
 - Organise special events such as a ‘Walk to work/school on Wednesdays’ where participants are rewarded for their participation;
 - Keep umbrellas in public areas on a deposit system for use when raining;
 - Display Smarter Travel Workplaces Accessibility Walking maps on notice boards areas so Residents can plan journeys;
 - Organise lunch time or afternoon walks as part of a health and well-being programme;
 - Highlight the direct savings gained due to reduced use of private vehicles.

Cycling

Cycling – Key Information	
Approx. zone of influence	10km
Percentage of Residents & Staff working within the area of influence	TBC in each survey when occupied
Percentage of Residents & Staff interested in cycling	TBC in each survey when occupied

Table 4.2 : Key Information - Cycling

- 4.6 Research suggests that cycling is a viable mode of transport for people who live up to 10 km from work or school.
- 4.7 Cycling is a great way to travel. It helps foster independence, raises awareness of road safety, and helps the environment.
- 4.8 Some positive aspects of cycling to work or school are listed following:
- **C** - Cycling is fun! - Cycling is a great form of transport but it's also a great recreational activity. Cycling is a skill that stays with you for life and it's a fantastic way to explore your local community;
 - **Y** - You save time & money - cycling to work reduces the need to travel by car thus reducing fuel costs and freeing up road space for more cyclists;
 - **C** - Confidence building - travelling to work as an independent cyclist can give people

increased confidence proving beneficial in all aspects of life;

- **L** - Less congestion - If you leave the car at home and cycle to work there are fewer cars on the road which makes it safer for those who cycle and walk to work or school;
- **I** - Interpersonal skills - Cycling to work or to school can be a great way to meet other cyclists and share the experience;
- **N** - New adventures - Cycling to work or school is a great way to learn about your local environment and community. It helps people to understand where they live and how their actions affect their local environment;
- **G** - Get fit and stay active - cycling to and from work or school helps people incorporate physical activity into their daily routines. Research shows that regular physical activity can benefit your body and mind.

4.9 The provision of enhanced and attractive cycle parking facilities at the site will clearly play a critical role in promoting journeys by bicycle.

4.10 The following initiatives and incentives can be used to encourage cycling to work and school:

- New cycle parking installed within the development, secure and well lit;
- Publicise cycle parking availability by way of signage and on notice boards;
- Display maps on notice boards areas so people can plan journeys;
- The development can provide free cycle accessories (panniers, lights, visi-vests, helmets) in periodic draws for cyclists,
- The Travel Plan Coordinator can organise cycle training sessions on site on the rules of the road and the specific risks associated with the locality;
- The Travel Plan Coordinator can invite bike suppliers on site for a 'Green Day' or 'Green Week' so that people can try bikes before buying;
- The Travel Plan Coordinator can set up a Bicycle User Group (BUG) to promote cycling;
- The Travel Plan Coordinator can highlight the direct savings gained due to reduced use of private vehicles;
- The Travel Plan Coordinator can encourage residents to take part in National Bike Week, see www.bikeweek.ie.

Public Transport

Public Transport – Key Information	
Approx. zone of influence	All Residents
Percentage of Residents & Staff in area of influence	100%
Percentage of Residents & Staff using Public Transport	TBC in each survey when occupied

Table 4.3: Key Information: Public Transport

4.11 There are many benefits to taking public transport, some of which include:

- Personal Opportunities – Public transportation provides personal mobility and freedom;
- Saving fuel – Every full standard bus can take more than 50 cars off the road, resulting in fuel savings from reduced congestion;
- Reducing congestion – The more people who travel to work or to school on public transport, especially during peak periods, the less people travelling by private car;
- Saving money – Taking public transport to and from work or school is a lot cheaper than travelling by car and saves the cost of buying, maintaining and running a vehicle;
- Reducing fuel consumption – A full standard bus uses significantly less fuel per passenger than the average car;
- Reducing carbon footprint – Public transport is at least twice as energy efficient as private cars. Buses produce less than half the CO2 emissions per passenger kilometre compared to cars and a full bus produces 377 times less carbon monoxide than a full car;
- Get fit and stay active - Walking to and from work or school to public transport helps people incorporate physical activity into their daily routines. Research shows that regular physical activity can benefit your body and mind.
- Less stress – Using public transport can be less stressful than driving yourself, allowing you to relax, read, or listen to music.

4.12 The following initiatives and incentives can be used to encourage people to take public transport:

- Publicise Employee Tax Saver Commuter tickets, which offer savings to employers in PSRI per ticket sold and significant savings to employees in marginal tax rate and levies on the price of their ticket;
- Encourage public transport use for travel by promoting smart cards, advertising the availability of these tickets to Residents;
- Publicise the availability of Real Time Information. Real Time Information shows when your bus is due to arrive at your bus stop so you can plan your journey more accurately;

- Provide maps of local bus routes and the nearest bus stops and the length of time it takes to walk to them;
- Contact local providers about issues such as location of existing and new bus stops, timing of routes, or where you have market information about a potential new route.

Go-Car/Car Sharing

Car Sharing – Key Information	
Approx. zone of influence	All Residents
Percentage of Residents & Staff in area of influence	100%
Percentage of Residents & Staff Car Sharing	TBC in each survey when occupied

Table 4.4: Key Information - Go-Car/Car Sharing

- 4.13 Every day thousands of commuters drive to work or to school on the same routes to the same destinations, at the same time as their colleagues. By car sharing just once a week, a commuter's fuel costs can be reduced by 20%, and in a similar fashion, the demand for work place parking can be reduced by 20%. If every single-occupancy driver carried another driver, there would be 50% less cars on the road at peak times.
- 4.14 Although use of the car to get to work or to school is essential for some people, car sharing schemes such as GoCar (which are active in Galway, with 5no. car spaces provided on site) have the potential to deliver a significant reduction in private vehicle trips by promoting higher than average occupancy rates for each vehicle.
- 4.15 Car sharing often happens informally, however some participants often prefer a formal scheme such as a GoCar facility which will normally generate a higher take-up for car sharing, as is provided here with significantly more efficiency in terms of increased occupancy rates.
- 4.16 Encouraging more Residents to share car journeys to work rather than driving alone as well as encouraging more to set up and take part in car sharing/pooling would prove a very effective means of reducing daily car trips to and from the site.
- 4.16 The following initiatives and incentives can be used to encourage car sharing:
- Highlight to drivers that they do not have to share with a person that doesn't suit them – allow choice based on gender, route, smoking or non-smoking;
 - Clarify the financial implications of the scheme – those accepting a lift could contribute towards fuel costs.
 - Use existing online databases for car sharing. For example, the development

could set up its own private car sharing site using www.carsharing.ie.

Action Plan Summary Table

- 4.17 The Summary Action Plan is described in the Table below. Modal Split Targets will be determined following on from the first Residential survey shortly after full occupation, typically within the first six months. This will be part of the role of the Travel Plan Coordinator. This will show existing travel patterns with realistic targets set to improve the modal split of Residents.

	Initiative	Impact on Delivery	Difficulty Delivering	Current Modal Split	Target MS
Initiatives	Walking	Medium	Low	TBC	TBC

Promoting the TP	Marketing the Plan	High	Low	Driven By TP Coordinator	
	Measuring Success	High	Medium	Annual Surveys	

Action Plan Summary Table

5.0 IMPLEMENTING THE PLAN

Background

- 5.1 Setting realistic targets and a sustained approach to the promotion of the Travel Plan is important if the measures are to be successful. The objectives and benefits of the Plan will be made clear and broadcast during the full lifecycle of the Plan.
- 5.2 The implementation of a successful Travel plan will require the upfront investment of resources. As well as reviewing objectives and initiatives regularly, it is equally important to measure results. This provides an indication of any Plan's success, and ensures that the targets remain realistic.

The Travel Plan Coordinator

- 5.4 The key objective of this Travel Plan is to ensure that the traffic impacts and car usage associated with the operation any development are minimised. Achieving this objective will result in a wide array of benefits for the development and its stakeholders.
- 5.5 To ensure the plan is effective it is essential for a Travel Plan Coordinator to be appointed for the Development upon occupation. It is anticipated that this is role which will be fulfilled by the Management Company.
- 5.6 It is envisaged that the Coordinator will work closely with residents to enthusiastically promote and market the Travel Plan. As Residents will be the focus of the plan; their involvement must be sought from the outset.
- 5.7 To support the Travel Plan Coordinator's efforts, the Management Company must ensure that they have sufficient time to carry out their duties. In addition, it is essential that the powers of decision making are bestowed upon him/her, along with a suitable budget and programme for implementation.

Promoting the Travel Plan

- 5.9 Active promotion and marketing is needed if the Travel Plan is to have a positive impact on stakeholder travel patterns to and from the site.
- 5.10 All marketing initiatives should be focused on areas where there is willingness to change. Such information has been extracted from the questionnaires and has been described in Section 3 of this Plan.

- **Identify the Aim** – e.g. to reduce low occupancy car commuting, school, and business travel & to promote active travel, public transport & alternatives to travelling by car.

- **Brand the Plan** – as part of communicating the Travel Plan, visually brand all work relating to it with a consistent look, slogan, identity or logo.
 - **Identify the Target Audience** – 'segment the audience' (e.g. shift workers, school travel, sedentary workers, people travelling long/ short distances, mode used, members of a walking club or green team) so you can target the message and events towards these different groups.
- 5.11 As part of the marketing process, the Travel Plan coordinator can personalise a plan for the Development, drawing attention to the benefits of participation and support for its implementation.
- 5.12 The Coordinator can identify communication tools and networks used by the different audiences in the development, and use these to communicate about travel.
- 5.13 Promotional material regardless of its quality is only as good as its distribution network; material incentives assist greatly in introducing people to alternative modes of commuting.
- 5.14 The plan should be about promoting equity among modes and offering choice and accessibility.
- 5.15 The Coordinator can promote positive messages associated with a plan, for example, reduced tax/PRSI payments, getting fit and active, reducing congestion, reducing CO2 emissions and so on, and encourage people to start small – changing one day per week for example, to explore their options.
- 5.16 Marketing drives which feature individual Residents and Staff who have reduced their car use can carry a strong message. This will serve to raise not only the profile of the Plan, but also send a clear message in relation to the Residents and Staff commitment to the Plan.

6.0 CONCLUSIONS

- 6.1 The proposed mixed-use development accords with the principles of sustainable development, being located within Galway City Centre, its proximity to services, shops and amenities, clear and easy access to current and future high quality alternative modes of travel. With restricted provision of private car parking, this also acts as a demand management measure. The Management Company, once the development is occupied, will utilise pragmatic measures that encourage safe and viable alternatives to the private car for accessing the development.
- 6.2 Good Travel Planning is not a one-off event, it is instead an on-going iterative process requiring continued effort. This report assists these efforts by forming an outline framework and providing guidance for its success. Monitoring and reviewing the initiatives set out within the plan will form a far greater part of the Final Travel Plan itself.
- 6.3 The key to the Plans success will be the appointment of a **Travel Plan Coordinator** for the development, once occupied. They will be vested with total responsibility for implementing the plan. They should be granted the authority and time to execute the Plan and be provided with sufficient resources to realise the Plans success.
- 6.4 As Residents are the focus of the plan; their involvement should be sought from the outset following occupation. To this end, the Plan Coordinator should be assisted and supported by the Management Company and Residents. This will serve to spread the work load, and also give the Residents (and any Staff) a valuable input into the operation of the Plan.
- 6.5 Successful Travel Plans require marketing and regular review. The measures set out in the Action Plan Summary Table (Chapter 4) should form the basis of a sound, realistic Plan and should be clearly set out and be fully transparent to all users.
- 6.6 Residents also have an essential responsibility in terms of co-operating with, and taking an active part in the plan. They are, after all, the plan's primary focus.
- 6.7 It is recommended that the Final Travel Plan be set in motion, sensibly at full residential occupation. The plan should evolve and develop with the development, taking into account changing Residents and their travel preferences and needs.
- 6.8 Annual reviews of the Plan should include a full stakeholder survey, providing valuable information for target setting and marketing target groups. It is emphasised that failing to meet initial targets should not be seen as failure, as the preliminary 12 to 18 months of the plan should be viewed as a calibration exercise for target setting.

1.0 Introduction

This report was prepared in response to a request from Brian McMahon, NRB Consulting Engineers, for a Quality Audit and a DMURS Street Design Audit of the proposed mixed use development off Lough Atalia Road in Galway Port. A Stage 1 Road Safety Audit which forms part of the overall Quality Audit was carried out separately and is included as an appendix to this report for completeness.

The Road Safety and Quality Audit Team comprised of;

Team Leader: **Norman Bruton**, BE CEng FIEI, Cert Comp RSA.

TII Road safety Auditor approval number: NB 168446

Team Member: **Owen O'Reilly**, B.Sc. Eng Dip Struct. Eng NCEA Civil Dip Civil. Eng CEng MIEI

TII Auditor Approval no: OO 1291756

This portion of the Quality Audit involved the examination of drawings and other material and a site visit by the Audit Team, together, on the 1st of July 2025. The weather at the time of the daytime site visit was dry and the road surface was also dry.

The Stage 1 Road Safety Audit has been carried out in accordance with the requirements of TII Publication Number GE-STY-01024, dated May 2025.(See Appendix D)

The Quality Audit has been carried out in accordance with the guidance in the Design Manual for Urban Roads and Streets (DMURS), produced by Department of Transport Tourism and Sport in March 2013 and as updated in June 2019 including Advice Notes. The Quality Audit is composed of a number of distinct audits which include an Accessibility Audit, a Walking Audit and a Cycling Audit (i.e. aspects of a Quality Audit carried out independent of the Design Team).

The Street Design Audit has also been carried out in accordance with the guidance in the Design Manual for Urban Roads and Streets (DMURS), produced by Department of Transport Tourism and Sport in March 2013 and as updated in 2019.

The DMURS Street Design Audit is primarily concerned with four major aspects of street design:

- Connectivity
- Self-Regulating Street Environment
- Pedestrian and Cycling Environment
- Visual Quality

The scheme has been examined and this report compiled in respect of the consideration of those matters that have an adverse effect on road safety. It has not been examined or verified for compliance with any other standards or criteria. The problems/issues identified in this report are considered to require action in order to improve the safety of the scheme for road users.

NRB

The information supplied to the Audit Team is listed in **Appendix A**.

The feedback form for the Quality Audit is contained in **Appendix B**.

A plan drawing showing the locations of the issues identified in the Quality Audit is contained in **Appendix C**.

The Stage 1 Road Safety Audit including the signed feedback form is provided in **Appendix D**.

NRB

2.0 Background

It is proposed to construct a mixed use development off Lough Atalia Road at Galway Port.

A vehicular access is to be provided via an upgraded access adjacent to the filling station on Lough Atalia Road.

An entry only vehicular access is to be provided off Galway Harbour Enterprise Park.

The speed limit is 50km/hr on Lough Atalia Road and it is assumed that it will be 30km/hr or less within the development.

The Stage 1 Road Safety Audit was carried out in July 2025. Based on recommendations in that report and general design development the scheme proposals have been updated by the Design Team. This Quality Audit and DMURS Street Design Audit is based on the updated drawings.

3.0 Site location

The site location is shown below.

Location Map (image courtesy of openstreetmap.org)

NRB

4.0 Issues Raised in this Stage 1 Quality Audit – Accessibility Audit.

4.1 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Toucan Crossing.

ISSUE

The tactile paving at the toucan crossing is shown as being yellow/buff in colour. As this is a controlled crossing red coloured tactile paving should be provided to inform pedestrians that they can have priority.

RECOMMENDATION

It is recommended that red coloured tactile paving be provided.

NRB

4.2 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Raised Table

ISSUE

The proposed raised table after the filling station egress and at the entrance to the development has an uncontrolled pedestrian crossing with tactile paving. It is unclear if there will be a kerb upstand elsewhere other than the crossing point. If not, a blind or partially sighted pedestrian could inadvertently enter the carriageway. In addition, it would be easy for larger vehicles to overrun onto the footpath especially with the low horizontal radius.

RECOMMENDATION

It is recommended that a suitable kerb upstand be provided at the raised table other than at the uncontrolled crossing.

NRB

4.3 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, EV charging spaces.

ISSUE

It is unclear where the charging units for the EV charging spaces are to be provided and if they will block /partially block the footpath or if there will be charging cables across the footpath which could limit accessibility or be trip hazards.

RECOMMENDATION

It is recommended that adequate room be provided for EV charging equipment so as not to limit accessibility along the footpath.

NRB

4.4 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Disabled Parking spaces.

ISSUE

It is unclear if dropped kerbs are being provided at the disabled parking spaces to facilitate access to the footpath network.

RECOMMENDATION

It is recommended that dropped kerbs be provided at each disabled parking space.

NRB

4.5 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Disabled Parking space, Galway Harbour Enterprise Park.

ISSUE

It is unclear how pedestrians can progress along the footpath where the disabled parking space is indented into the footpath.

RECOMMENDATION

It is recommended that a continuous footpath be provided without pedestrians having to use the nearby steps.

NRB

4.6 Issue

LOCATION

Drawing 24-612-SDA-PD-DR-GF-001 Steps.

ISSUE

There are many proposed steps throughout the development. Without suitable warning, blind or partially sighted pedestrians might not know that they are present.

Example only.

RECOMMENDATION

It is recommended that corduroy tactile paving be provided at the top and bottom of the steps along will colour contrasting steps as per the guidance provided in Technical Guidance Document of Part M of the Building Regulations.

NRB

5.0 Issues Raised in this Stage 1 Quality Audit – Walking Audit

5.1 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Filling Station.

There may be a pedestrian desire line to the development along the footpath on the filling station side. There are currently no proposals to provide a pedestrian crossing.

RECOMMENDATION

It is recommended that an uncontrolled crossing and continuous footpath be provided.

NRB

5.2 Issue

LOCATION

Drawing 11910-2003 P04, TOBIN, Opening Doors.

Many external doors of the building open onto pedestrian paths. There is a risk that pedestrians may be struck by opening doors.

Example only

RECOMMENDATION

It is recommended that suitable warning be provided for external doors that have to open outwards in public areas.

NRB

6.0 Issues Raised in this Stage 1 Quality Audit – Cycling Audit

6.1 Issue

LOCATION

Throughout the scheme.

ISSUE

It is unclear where access is available to the proposed sheltered cycle stands that are located against buildings and if hardstanding is provided to the access points for those areas adjacent to landscaped areas.

RECOMMENDATION

It is recommended that the bicycle parking for residents be fully accessible.

NRB

6.2 Issue

LOCATION

Throughout the scheme.

ISSUE

It is unclear if any provision has been made for parking of cargo bikes. Cargo bikes take additional space to store than conventional bikes.

RECOMMENDATION

It is recommended that adequate cargo bike storage be provided.

NRB

7.0 Street Design Audit.

The Street Design Audit taken into consideration the issues and DMURS references as outlined in the template provided at DMURS.ie. The comments added in the 3rd Column below are provided by the Audit Team who are independent of the Design Team. An additional column has been provided for the Design Team Comments (shown in red for clarity). This is a planning stage audit and many DMURS references in Column 2 will not be addressed at this stage of the design. This Street Design Audit may be repeated as the design and construction develops.

Connectivity			
Key Issues	Key DMURS Reference.	Audit Team Comments	Design Team Comments
Strategic routes/major desire lines been identified and are clearly incorporated into the design.	3.1 – Integrated Street Network 3.2.1 – Movement Function 3.3.1 – Street layouts 3.3.4 - Wayfinding	Access from both ends for all users. Vehicular only streets are different to areas for vulnerable road users and clearly marked. The crossing points give higher priority to vulnerable road users and good use of colour contrast.	Agreed and confirmed.
Multiple points of access are provided to the site/place, in particular for sustainable modes.	3.3.1 – Street Layouts 3.3.3 – Retrofitting ¹	Multiple access points providing access for all road users. Existing on street parking being upgraded and access for mobility	Agreed and confirmed.

NRB

Connectivity			
		impaired included in the design.	
Accessibility throughout the site is maximised for pedestrians and cyclists, ensuring route choice.	3.3.1 – Street Layouts 3.3.2 – Block Sizes 3.4.1 – Vehicle Permeability	Note from the response to the Road Safety Audit that some work is required on Lough Atalia Road for bringing cycle facilities to the proposed toucan crossing. The internal layout of streets and blocks is predominantly for pedestrians and cyclists with limited vehicular streets.	Yes, recent discussions with GCC noted that they are currently reviewing the current pedestrian and cycle facilities on Lough Atalia Road, which will be delivered by GCC.
Through movements by private vehicles on local streets are discouraged by an appropriate level of traffic calming measures.	3.2.1 – Movement Function 3.2.3 – Place Context 3.4.1 – Vehicle Permeability	Note from the Road Safety Audit that vehicle permeability is to be balanced so that the route through the development does not become a rat-run. The entrance to the one-way street is restrictive for non-destination traffic to enter.	Yes, the Kerbline at the access has been designed to deter rat running at this location.

NRB

Self-Regulating Street Environment

Key Issues	Key DMURS Reference.	Audit Team Comments	Design Team Comments
A suitable range of design speeds have been applied with regard to context and function.	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.1.1 – A Balanced Approach to Speed ²	Sharp turn combined with raised table at Filling station gives sense of alternative environment. Narrow lanes and raised features at pedestrian crossing locations to provide traffic calming. Self regulating speed design features.	Agreed and confirmed.
The street environment will facilitate the creation of a traffic calmed environment via the use of 'softer' or passive measures. ³	4.2.1 – Building Height and Street Width 4.2.2 – Street Trees 4.2.3 – Active Street Edges 4.2.4 – Signage and Line Marking 4.2.7 – Planting	Extensive landscaping throughout. Upgrade to and additional on-street parking on Lough Atalia Road/Harbour Road will give a sense of place (residential) which is different to the nearby industrial/commercial image of the port and of heavy vehicles.	Agreed and confirmed.

NRB

Self-Regulating Street Environment

	4.4.2 – Carriageway Surfaces 4.4.9 - On-Street Parking Advice Note 1 – Transitions and Gateways		
--	---	--	--

A suitable range of design standards/measures have been applied that are consistent with the applied design speeds.	4.4.1 - Carriageway Widths 4.4.4 – Forward Visibility 4.4.5 – Visibility Splays 4.4.6 – Alignment and curvature 4.4.7 – Horizontal and Vertical Deflections Advice Note 1 – Transitions and Gateways	Note that forward visibility to the toucan crossing was addressed in the Road Safety Audit and shown in the subsequent drawings for the Quality Audit. Use of both horizontal and vertical deflection to achieve low design speeds.	Agreed and confirmed.
---	---	--	-----------------------

NRB

Pedestrian & Cycle Environment			
Key Issues	Key DMURS Reference.	Audit Team Comments	Design Team Comments
The built environment contributes to the creation of a safe and comfortable pedestrian environment.	4.2.1 – Building Height and Street Width 4.2.3 – Active Street Edges 4.2.5 – Street Furniture 4.4.9 - On-Street parking	Toucan crossing on main Lough Atalia Road provided for a controlled crossing for pedestrians. Raised crossings internally gives higher priority to pedestrians.	Agreed and confirmed.
Junctions been designed to ensure the needs of pedestrians and cyclists are prioritised ⁴ .	4.3.2 - Pedestrian Crossings 4.3.3 – Corner Radii 4.4.3 - Junction Design 4.4.7 - Horizontal and Vertical Deflections	Raised crossing at both access junctions for pedestrians. Query in the Quality Audit over the northern access adjacent to the filling station and	Agreed and confirmed. An uncontrolled crossing will be provided, but dropped kerbs and tactile paving.

NRB

		the potential pedestrian desire line.	
Footpaths are continuous and wide enough to cater for the anticipated number of pedestrian movements.	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.2.5 – Street Furniture 4.3.1 - Footways, Verges and Strips 4.3.2 - Pedestrian Crossings	Potential footpath pinch point at the disabled parking space on the southern end of Harbour Road	The car parking spaces have been redesigned, with a wider footpath provided.

NRB

Pedestrian and Cycling Environment (cont)

Key Issues	Key DMURS Reference.	Audit Team Comments	Design Team Comments
The particular needs of visually and mobility impaired users been identified and incorporated in the design.	4.2.5 - Street Furniture 4.3.1 - Footways, Verges and Strips 4.2.5 - Street Furniture 4.3.2 - Pedestrian Crossings 4.3.4 - Pedestrianised and Shared Surfaces	<p>Some queries in the accessibility section of the Quality Audit however it is expected that the construction details at the latter stages of the design will address such issues.</p> <p>Given the scale of the development and the closeness to Galway City centre it has to be assumed that there will be use by visually impaired and blind residents/visitors. Consistent and thorough use of tactile paving of the correct colour, shape, type and orientation is required.</p>	Agreed and confirmed.
Cycling facilities will cater for cyclists of all ages and abilities. ⁵	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.3.5 - Cycle facilities.	Internally, yes, externally as above, separately Galway County Council to improve cycle facilities on Lough Atalia Road as per response to the Road Safety Audit.	Agreed and confirmed. Yes, recent discussions with GCC noted that they are currently reviewing the current pedestrian and cycle facilities on Lough Atalia Road, which will be delivered by GCC.

NRB

Visual Quality			
Key Issues	Key Considerations and DMURS Ref:	Audit Team Comments	Design Team Comments
The landscape plan responds to the street hierarchy and the value of the place.	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.2.2 – Street Trees 4.2.7 – Planting Advice Note 1 – Transitions and Gateways	Extensive landscaping proposals provided.	Agreed and confirmed.
Street furniture is orderly placed.	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.2.5 - Street Furniture. 4.3.1 Footways, Verges and Strips	Recessed seating has been provided where required and bicycle parking out of pedestrian direct routes.	Agreed and confirmed.
The use of signage and line marking has been minimised.	3.2.1 – Movement Function.	Signage and markings generally only for vehicular traffic and for regulatory,	Agreed and confirmed.

NRB

	3.2.3 – Place Context. 4.2.4 - Signage and Line Marking.	enforceability purposes and for priority. Signage and road marking minimised elsewhere.	
Materials and finishes used throughout the scheme have been selected from a limited palette and respond to the value of the place?	3.2.1 – Movement Function. 3.2.3 – Place Context. 4.2.6 – Materials and Finishes 4.2.8 – Historic Contexts. 4.3.2 – Pedestrian Crossings 4.4.2 – Carriageway Surfaces Advice Note 2 – Materials and Specifications	Comprehensive use of materials in the landscape proposals. Good use of colour contrast to aid with place context.	Agreed and confirmed.

NRB

8.0 Audit Statements

Quality Audit Statement

We certify that we have carried out this audit in accordance with DMURS for those areas independent of the Design team.

DMURS Street Design Audit Statement

We certify that we have carried out this audit in accordance with DMURS as independent auditors to the Design Process. The facility for the design Team to comment on the various audit headings has been provided as this is not solely an independent role and is to be carried out in conjunction with the Design Team.

TII Auditor Approval no: OO 1291756

The Road Safety Audit comprised an examination of the drawings provided and a site visit on the 1st of July 2025.

The weather at the time of the daytime site visit was dry and the road surface was also dry.

This Stage 1 Road Safety Audit has been carried out in accordance with the requirements of TII Publication Number GE-STY-01024, dated May 2025.

The scheme has been examined and this report compiled in respect of the consideration of those matters that have an adverse effect on road safety. It has not been examined or verified for compliance with any other standards or criteria.

The problems identified in this report are considered to require action in order to improve the safety of the scheme for road users.

If any of the recommendations within this safety audit report are not accepted, a written response is required, stating reasons for non-acceptance. Comments made within the report under the heading of Observation are intended to be for information only. Written responses to Observations are not required.

A location map showing where each problem occurs is provided in **Appendix A**.

A list of the documents provided to the Audit Team is provided in **Appendix B**.

The feedback form is provided in **Appendix C**.

2.0 Background

It is proposed to construct a mixed use development off Lough Atalia Road at Galway Port.

A vehicular access is to be provided via an upgraded access adjacent to the filling station on Lough Atalia Road.

An entry only vehicular access is to be provided off Galway Harbour Enterprise Park.

The speed limit is 50km/hr on Lough Atalia Road and it is assumed that it will be 30km/hr within the development.

The site location is shown below.

3.0 Issued Raised in This Road Safety Audit.

3.1 Problem

Location.

Drawing 11910-2003 D09, Proposed Toucan Crossing.

Problem.

There is a sharp bend in the carriageway south of the proposed toucan crossing. It is not clear if drivers will have sufficient stopping sight distance to the crossing if they have to stop to allow pedestrians or cyclists to cross.

Recommendation

It is recommended that an assessment of the stopping sight distance be carried out to ensure there is sufficient available also taking into account the condition of the existing surfacing course.

3.2 Problem

Location.

Drawing 11910-2003 D09, Proposed Toucan Crossing.

Problem.

The cycle lanes on Lough Atalia Road only commence/terminate north of the filling station. There is no provision for cyclists along the new toucan crossing or in the new verge along the site boundary. There is also a ‘no cyclist’ sign close to the proposed crossing. The lack of cycle facilities could result in cyclists from the development having to travel on the carriageway for greater distances thereby increasing the risk of collisions with vehicular traffic.

Recommendation

It is recommended that the cycle facilities along both sides of Lough Atalia Road be extended to the proposed crossing.

3.3 Problem

Location.

Drawing 11910-2003 D09, Filling Station car park.

Problem.

It is unclear where priority will be for vehicles exiting the proposed development or the filling station car park. A lack of priority could lead to side-impact collisions.

Recommendation

It is recommended that suitable priority be provided and suitable visibility splays at the minor arm of the junction.

3.4 Problem

Location.

Drawing 11910-2003 D09, Internal Road network.

Problem.

There is a risk that the new road network may be used as a rat-run for workers in the harbour area to avoid the busy junction at the Harbour Hotel. A rat-run would lead to higher speeds and less regard for vulnerable road users along the internal road network which would increase the likelihood of collisions.

Recommendation

It is recommended that enough traffic calming features be provided to make the route unattractive for rat-running.

3.5 Problem

Location.

Drawing 11910-2003 D09, Internal Road network.

Problem.

If a driver enters the development from Lough Atalia Road and the car park is full there is no place to turn and travel back to Lough Atalia Road. This could lead to material damage of other parked vehicles as drivers attempt to turn in a tight space.

Recommendation

It is recommended that suitable space for turning be provided.

3.6 Problem

Location.

Drawing 11910-2003 D09, Internal Road network.

Problem.

The disabled parking space on the one-way road does not have a buffer zone along the vehicle. Drivers will have to park a long way from the kerb edge to have space along the vehicle to access the boot or other equipment. This could lead to side-swipe collisions with other vehicles or to collisions with such users.

Recommendation

It is recommended that a longitudinal buffer zone be provided independent of the traffic lane.

3.7 Problem

Location.

Drawing 11910-2003 D09, Parallel Parking on Galway Harbour Enterprise Park.

Problem.

The disabled parking space's longitudinal buffer zone is included as part of the footpath. It is not clear if the path is at-grade. A level difference would lead to accessibility for wheelchair users and possible falls.

Recommendation

It is recommended that the buffer zone be independent of the footpath and carriageway.

3.8 Problem

Location.

Drawing 11910-2003 D09, Refuse collection.

Problem.

It is unclear what route refuse vehicles will take to collect refuse. A lack of turning space could lead to material damage of streetside furniture or parked vehicles.

Recommendation

It is recommended that a swept path analysis for a refuse vehicle be carried out including stopping at collection/staging areas.

4.0 Observations

4.1 Observation

It is assumed that at detailed design that red coloured tactile paving will be provided at the toucan crossing.

5.0 Audit Statement

We certify that we have examined the material provided and the site. The examination has been carried out with the sole purpose of identifying any aspects of the design which could be added, removed or modified in order to improve the safety of the scheme.

The problems identified have been noted in this report together with associated safety improvement suggestions which we would recommend should be studied for implementation. The audit has been carried out by the persons named below who have not been involved in any design work on this scheme as a member of the Design Team.

1. INTRODUCTION

TOBIN were appointed to provide engineering consultancy services for the proposed ‘Large-Scale Residential Development’ (LRD) at a site of 1.621Ha in Galway Port at Dock Road and Lough Atalia Road. (Figure 1.1 – Site Location & Figure 1.2 - Proposed Site Layout).

This report has been prepared to accompany the civil works planning submission element of the proposed development.

The proposed development principally consists of the demolition of the existing office / bus depot building (370.2 sq m) and ancillary building (26 sq m); the partial demolition of the existing ESB sub-station (67.4 sq m); the demolition of existing boundary walls at the south-west and north-west; and the construction of a mixed-use development.

The proposed mixed-use development primarily comprises: 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9 sq m); 2 No. café/restaurant units (totalling 428.4 sq m) and 1 No. retail unit (156.0 sq m). The development has a total floor area of 32,096.0 sq m and is primarily proposed in 4 No. blocks (identified as A–D) that generally range in height from 6 No. to 13 No. storeys.

The proposed development also includes: new internal street and pedestrian network, including a one-way vehicular route at the north-western side of the site and new junctions with Dock Road at the south-west and with the access road from Lough Atalia at the north-west; upgrades to Lough Atalia Road and the access road from it at the north-west of the site, including the provision of a new toucan pedestrian/cycle crossing at Lough Atalia Road; upgrades to the footpath and road interface with Dock Road to the south-west; 37 No. car parking spaces; 1 No. set-down/delivery bay; 748 No. cycle parking spaces; hard and soft landscaping, including public open spaces and communal amenity spaces; private amenity spaces as balconies and terraces facing all directions; boundary treatments; public lighting; bin stores; plant rooms; rooftop lift overruns; rooftop telecommunications and plant infrastructure and enclosure at Block C; recladding of the existing substation and pumping station; and all associated works above and below ground.

An Environmental Impact Assessment Report and a Natura Impact Statement have been prepared in respect of the proposed development

Figure 1.1 Site Location

Figure 1.2 Proposed Site Layout

1.1 DMURS (2019) DESIGN PRINCIPLES

1.1.1 Design Principle 1:

To support the creation of integrated street networks which promote higher levels of permeability and legibility for all users, and in particular more sustainable forms of transport.

The site is currently in a mainly brownfield condition with the road frontage onto Lough Atalia Road. The site has historically been reclaimed in at least two stages and subsequently contained tanks containing hydrocarbons. These tanks have since been decommissioned and removed. Currently, the site is a laydown area for turbine parts which are in transit.

The extent to which this application pertains is shown outlined in red throughout the documents and drawings included in this application.

The external road network is existing from Lough Atalia which continues onto the Old Dublin Road, allowing access onto the M6 Motorway. This allows for connectivity to and from Galway City.

The main design objectives of the residential scheme are as follows:

- Create a series of strong links to the adjacent amenities while providing a new local centre within the development area.
- Ensure site layout is optimised to provide passive surveillance to open areas which will discourage anti-social behaviour.
- Ensure the layout and design allow for pedestrian permeability for access to the larger recreational areas for all residents including green areas for ball games and a significant network of walking tracks.
- Vegetation where possible to provide a sense of maturity to the development.

The above objectives are in accordance with the principles of DMURS 2019 and the layout for the proposed housing scheme has been carefully developed to provide residential clusters which centre around open public spaces. Additionally, the development is completed with several varied walking routes which provide excellent permeability throughout the entirety of the development.

The street networks within the development have been designed to maximise connections between local area and services. Pedestrian routes are provided throughout the development. This ensures residents can access the main walking routes by the shortest route and avoid having to walk longer distances to get to their destination.

A high degree of permeability and legibility have been provided with the proposed layout creating a legible network of streets and footways which are easy to navigate for both drivers and pedestrians, and is consistent with adjacent developments providing a sense of integration within the broader residential context.

The main pedestrian access route to the proposed development is from the proposed entrance to the north of the site and off the existing Lough Atalia Road. Once outside the extent of the development, pedestrians shall utilise the existing pedestrian arrangements. See figure 1.3 and figure 1.4 below for walking and cycle distances.

Similarly, cyclists will utilise the main access route from the north and share the internal access roads with vehicular traffic. As the internal road network is designed as a low-speed environment with limited space for dedicated cycling infrastructure, this shared arrangement is in accordance with the principles of the Cycle Design Manual, which supports shared use in contexts where traffic volumes and speeds are low and cyclist safety and comfort can be maintained.

Figure 1.3 Walk from Entrance to Closest Train/Bus Station (Google Maps)

Figure 1.4 Cycle from Entrance to Train/Bus Station (Google Maps)

The site includes public open space throughout the site and can be seen in the site layout drawings. All public areas are well serviced by interconnected footways.

The development also remains well connected to the nearest train station which in turn provides good access to local amenities outside of Galway City. The nearest train station is in Galway City centre and the most convenient walking route for pedestrians and cyclists is on the Lough Atalia Road to the north. From the proposed site access to the train station is circa 750m away or approximately eleven-minute walk, or a 3-minute cycle.

1.1.2 Design Principle 2:

The promotion of multifunctional streets that balance the needs of all users within a self-regulating environment.

The proposed development also includes: new internal road network, including a filtered permeability route to the western side of the site and main entrance at the Lough Atalia Road to the north; upgrades from the Lough Atalia Road and along access road from it at the north-west of the site, including the provision of a new toucan pedestrian/cycle crossing; upgrades to the footpath and road interface with Dock Road to the south-west; 37 No. car parking spaces; 748 No. cycle parking spaces; hard and soft landscaping, including public and communal amenity spaces; private amenity spaces as balconies and terraces facing all directions; boundary treatments; public lighting; bin stores; plant rooms; rooftop telecommunications and plant infrastructure and recladding of existing sub-station; and all associated works above and below ground.

The road network design throughout the proposed development deliberately avoids a high number of long straight stretches of road whereby drivers may be tempted to use higher vehicle speeds. The linear nature of the site dictates the need for a central vehicular corridor; however, the presence of slight bends and vertical deflections helps to break up the otherwise continuous straight length of this corridor.

The use of short cul-de-sacs designed as within the site contributes to a passive approach to traffic calming, effectively managing vehicle speeds throughout the development while enhancing the overall experience for both pedestrians and drivers. Additional passive speed control measures—including pedestrian crossings, variations in surface materials, and raised crossings, road build outs—are incorporated throughout the layout. These elements align with the requirements of the Design Manual for Urban Roads and Streets (DMURS), supporting a safer and more user-friendly streetscape.

The development provides for a mixed-use car park, serving both parking for residents, deliveries and creche services, accumulating a total of 37 car parking spaces, with limited 'on curtilage' parking available. EV vehicle parking will also be accommodated. This is reflective of homeowner preferences for having private vehicles accommodated within the boundary of individual property plots. This approach also helps to minimise the visual impact and perceived dominance of on-street parking.

The proposed on-street parking follows a perpendicular orientation, consistent with the guidance set out in Section 4.4.9, 'On-Street Parking and Loading' of DMURS (2019), which allows for flexibility in parking arrangements based on the specific urban context. In this case, parallel parking has not been included due to the linear nature of the site and the width constraints of the internal road network, which would limit the efficiency and capacity of parallel parking. Perpendicular parking was considered the most appropriate solution to maximise space utilisation and ensure ease of access for vehicles, while maintaining a safe and navigable streetscape.

Figure 1.5 Extract from Section 4.4.9 DMURS 2019

Figure 4.76: Extract from the Newcastle LAP (South Dublin County Council) illustrating the layout of a Local street with a uniform mix of parallel and perpendicular parking.

Pedestrian crossings are provided throughout the development, ensuring safe and convenient access for all pedestrians to every part of the site. This measure alone serves as the traffic calming solution within the development, ensuring ease of access for all pedestrians to every area.

The development promotes the integration of pedestrians, cyclists, and vehicles in accordance with Section 1.7.1 of the National Cycle Manual (NCM).

Figure 1.6 Extract from the Cycle Design Manual

Cycle Design Manual								Version 1.0
Table 2.1 - Cycle facilities selection guide								
Speed Limit ¹	Two-way traffic flow (peak hour pccus)	Remote Cycleway/Greenway	Standard cycle track (incl. two-way tracks)	Stepped cycle track	Protected Cycle Lane	Mandatory Cycle Lane	Mixed Traffic

	≥ 80 km/h							
 Provision should be suitable for most users. Provision may not be suitable for all and may exclude some potential users (Departure required). Provision not recommended as it's unlikely to be suitable for a range of users (Departure required). Provision not suitable.								
Notes: 1. If the 85th percentile motor traffic speed is more than 10% above the speed limit, the next highest speed limit should be applied.								

Figure 1.7 Section of Shared Surface for Pedestrian, Cyclist and Motorist use

Pedestrians can gain access to all areas of the proposed development through the proposed entrance to the north of the site by way of 2.5m wide footpaths, and internally the site is served by 3m wide footpaths and uncontrolled crossings. This will result in a continuous pedestrian route from all locations within the proposed development and to other local developments.

In accordance with section 4.3.5 of DMURS, which refers to the National Cycling Manual (NCM), this proposed development promotes cycling as a sustainable form of transport and seek to rebalance design priorities to promote a safer and more comfortable environment for cyclists. To achieve these goals, the NCM recognises the importance of slowing vehicular traffic within cities, villages, and the design advocates many of the measures contained within this manual, such as narrow vehicular carriageways and tighter corner radii.

Figure 4.52 from the DMURS Manual (Figure 1.8 below), provides an overview of the integration and segregation of cycle traffic within the carriageway based on vehicle speeds and traffic volumes. On lightly trafficked/low speed streets, as proposed on this development, designers are generally directed to create shared streets where cyclists and motor vehicles share the carriageway, as shown by the green symbol in the figure below. Therefore, shared cycle and vehicle surfaces shall be provided within the proposed development in line with these guidelines.

Figure 1.8 Extract from National Cycle Manual

1.1.3 Design Principle 3:

The quality of the street is measured by the quality of the pedestrian environment.

Vertical deflection has been positioned in the proposed development at specific locations to promote lower speed limits and to provide suitable crossing points for pedestrians. The footways adjacent to the roads have been provided through the development, further independent footpaths are included through the open spaces at the development entrance away from vehicular routes as illustrated on architectural drawings and landscaping drawings.

The pedestrian crossings located throughout the development are strategically positioned along key travel desire lines with the crossings having a minimum width of 2.0m accordance with DMURS 2019 guidelines. Pedestrian footways adjacent to the carriageways are minimum 1.8m wide. Road widths throughout the development are predominantly 5.5m wide with the exception of localised approaches to junction which are widened to accommodate vehicular movements in accordance with the guidance in DMURS (2019) section 4.4.1.

In line with the principles set out in the Design Manual for Urban Roads and Streets (DMURS), the proposed development seeks to reduce vehicle dominance in favour of creating a safer and more welcoming environment for pedestrians and cyclists. The internal layout incorporates a range of design features, including the use of distinctive surface materials and colour treatments, to foster a strong sense of place and enhance safety within the development. Additionally, the integration 'slow zone' areas, along with strategically placed planting and vegetation, is intended to naturally calm traffic and reinforce pedestrian priority. This approach is illustrated in the engineering roads layout, and architectural and landscape drawings.

Figure 1.9 Example of Street Surfaces

Figure 1.10 Example of Raised Pedestrian Crossing

1.1.4 Design Principle 4:

Greater communication and cooperation between design professionals through the promotion of a plan led, multidisciplinary approach to design.

The design of the proposed development has been carried out taking into account requirements from a number of disciplines including planning, architecture, landscape architecture, engineering and environmental specialists.

The design team have progressed through a number of iterations of the layout in line with comments received from each discipline throughout the design process and as information became available. This ultimately led to a robust, attractive site layout for future homeowners while adhering to the relevant guidelines and standards.

Discussions were held with Galway City Council and feedback received during these meetings was brought through to subsequent revisions of the site layout. The design team has strived to work in a collaborative manner to culminate in proposals that ultimately reflect a positive design which both satisfies the Developers objectives and meets the Council's requirements.

The resulting layout provides a development of high standard which incorporates spatial requirements for pedestrians, cyclists and motorists while taking into account relevant plans and policies.

The background of the image features a complex, abstract geometric pattern composed of numerous thin, translucent blue and white triangles. These triangles overlap and converge towards the center of the frame, creating a sense of depth and perspective. The lighting is soft, with highlights on the edges of the triangles, giving them a three-dimensional appearance.

B	Bus Timetable Information (<i>Correct at Time of Collating Data & Writing Report</i>)

1.0 INTRODUCTION

- 1.1 NRB Consulting Engineers Ltd were appointed to address the Public Transport demand and capacity associated with a 'Large-Scale Residential Development' (LRD) at a site in Galway Port at Dock Road and Lough Atalia Road, Galway City.
- 1.2 The proposed residential development will comprise 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9m²); 2 No. café/restaurant units (totalling 428.4m²) and 1 No. retail unit (156m²).
- 1.3 Part of the NRB commission on the project includes an assessment of current Public Transport capacity.
- 1.4 Whilst this Report contains an assessment of Bus capacity and demand, it should be remembered that Transport Service Providers are commercial in nature, running their businesses based on current demand rather than medium to longer term future demand. In simple terms, transport services are generally provided based on actual existing footfall rather than potential future demand. If there is an increased demand for services with full or over-capacity services in place, Operators then generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated by the services.
- 1.5 Notwithstanding the above, the purpose of this Study is to review the potential impact of the development upon the existing & future bus services in the vicinity of the site.
- 1.6 The analysis of the existing and future services is based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) Local Area Map Data, available through the SAP online mapping tool. This data was used to quantify the anticipated demand for services as a result of the proposed development locally, based on the local population in the adjacent CSO Small Areas.
- 1.7 The first step was to review the current and future planned services. The Bus stops within an easy walking distance of the subject site were identified, with the current bus services, frequency and capacity studied and assessed.
- 1.8 *Bus Connects* is expected to be fully implemented within a relatively short timeframe. This initiative will reconfigure the bus services for Galway City completely. This Study therefore

considers a demand that focuses on the existing bus network but also considers the planned *Bus Connects* Network.

- 1.9 The Study focuses on the peak commuter periods for the development, and in particular the busiest weekday AM commuter peak demand for services – this represents the period of highest demand on the network consistent with the TII Traffic & Transport Assessment Guidelines (May 2014). The methodology assumes that the trips will be assigned to the nearest available bus stops.

2.0 BUS LOCATIONS & SERVICES (CURRENT & FUTURE)

CURRENT SERVICES

- 2.1 For commuting, a walk distance to/ from Bus Stops of up to 1km is generally considered to be acceptable. For the purposes of this assessment, we have assumed a 5-7min walk time as being appropriate, reflecting a distance of 500-600m depending on speed of walking.
- 2.2 The proposed development is well placed to take advantage of the existing Bus services, with several stops serviced by high frequency bus services in close proximity to the site as illustrated in **Figure 2.1** below.

Figure 2.1 – Existing Bus Stops adjacent the Site

- 2.3 In terms of the Existing Bus Service Provision and Service Frequency, for completeness the Timetables in place for each existing Service within a generally-acceptable walking distance are included herein as **Appendix A**. These details have been collated and are summarised below as **Table 2.1**, extracting information relating to the busy 7-9am weekday AM Commuter Period.

Table 2.1; - Buses within Easy Walk Distance, 7-9am Approx Capacity.

Service #	Route (& Return)	No. Buses 7-9am (Mon - Fri)	Total Person Capacity (7-9am)	Thru City Core (Y/N)
401 (Bus Eireann)	Parkmore Rd to Dr. Mannix Rd via Eyre Sq.	12	1092	Y
402 (Bus Eireann)	Shangort Rd to Merlin Pk via Eyre Sq	10	910	Y
404 (Bus Eireann)	Oranmore to Westside SC via Eyre Square	8	728	Y
405 (Bus Eireann)	Gort na Bro to Ballybane via Eyre Sq	12	1092	Y
407 (Bus Eireann)	Eyre Sq to Bóthar an Chóiste	8	728	Y
409 (Bus Eireann)	Eyre Sq to An Pháirc Mhór	24	2184	Y
410 (City Direct)	Mount Prospect - Salthill - Eyre Square	2	182	Y
411 (City Direct)	Mount Prospect - Gateway Retail Park - Eyre Square	6	546	Y
412 (City Direct)	Mount Prospect - Gateway Retail Park - Eyre Square	8	728	Y
424 (Bus Eireann)	Galway to Lettermullen via Carraroe	4	136	Y
NOTE - The Above are based on a Standard DD Bus having a Capacity of 91 Persons, single decker coach of 34				
Total (7-9am) All Routes, within Easy Walk		94	8326	Seats

- 2.4 The above demonstrates that the site is clearly accessible to an adequate capacity existing bus provision, with a capacity of c.8,326 bus seats (Each Way) during the 7-9am commuter peak period, all within an 5-7 minute walk-distance of the site.
- 2.5 The Transport for Ireland, Bus Eireann websites (and Mobile Phone Apps) now provide a service that allows customers access up to date real information for arrivals and departures on a stop-by-stop basis. This information on Arrivals and Departures allows customers to plan their arrivals and departures & associated walk/cycle times accurately, facilitating efficient journey planning (and minimising congestion on platforms or stops).
- 2.6 Almost all of Bus Eireann & City Direct Bus Services consist of fleets of high quality comfortable 'Double Decker' Buses, being accessible buses with 'low-floor' technology incorporated into their design.
- 2.7 Transport for Ireland also provides an interactive online tool that enables the user to plan journeys, with real time information on Bus & Rail services on a nationwide basis.
- 2.8 We have also set out below details of the proposed bus service improvements locally as part of Bus Connects.

FUTURE BUS SERVICES

- 2.9 In terms of **Future Planned Services**, the NTA are pursuing plans for the overall bus network for the Galway. It is acknowledged that these bus services will be further enhanced by the new Bus Connects Network Changes that were recently announced, and this network included a very significant improvement in the service for the local area. The Galway Network Plan has now been published and we include below an extract from the plan showing the site location as **Figure 2.2**.

Figure 2.2 – Bus Connects Network Plan Extract

- 2.10 The site will be well served, being within easy distance of the Service Routes #1, #4, #7, #9, #10, #424. The planned frequency of service for each of these routes has now been published by the NTA and an extract is included below as **Figure 2.3**.
- 2.11 The Service Routes #1 & #9 has a service frequency of every 10-12 minutes at midday, #10 has a service frequency of every 15 minutes at midday, #7 has a service frequency of every 20 minutes at midday, #4 has a service frequency of every 30 minutes at midday, #424 has a service frequency of every 30 minutes at peak hours.

Figure 2.3 –Bus Frequency

- 2.12 The site is therefore clearly well placed to benefit from and contribute to the planned services as part of the BusConnects proposals.
- 2.13 All of the existing and planned Bus Eireann routes are operated using new low-floor wheelchair accessible city buses. Detail of route, timetable and fares are provided on the Transport for Ireland National Journey Planner App.
- 2.14 The site is therefore also ideally placed in terms of future high frequency bus availability, based on the NTAs published Plans, with significantly more frequent services than currently available.

3.0 BUS USE PREDICTIONS, CAPACITY & DEMAND

- 3.1 We have now used the CSO Small Area Mapping tool, extracting data for the Electoral Division of Eyre Square where the proposed site is located, to establish the proportion of Bus Users within the local area surrounding the site in order to estimate the additional demand for services, utilising real data rather than estimations of modal split. An annotated extract from the CSO Database Electoral Division Mapping used for this purpose is below as **Figure 3.1**.

Figure 3.1 –CSO Electoral Divisions: EYRE SQUARE

- 3.2 We have extracted information from the 2022 Census Data for the Small Areas using this Electoral Division to calculate the additional demand for Bus use during the busy weekday AM Commuter period, and this is illustrated below as **Table 3.1**.

Table 3.1 – Bus Demand Based on CSO Data & Expected Population

Electoral Area / Small Areas	Total Population	Total Commuters Age 5+ to Work, School or College	No. of Train Users	No. of Bus Users	No. of Commuters Leaving Home 7-9am to Work/Schl or College
Electoral Division	3024	2253	17	287	1,095
CALCULATION OF BUS DEMAND DUE TO DEVELOPMENT					
Percentage of Total Population in Area Commuting =					74.5%
Percentage of Total Population in Area Commuting By Bus =					9.5%
Percentage of Commuters Leaving Home 7-9am =					49%
1061	New Residents in Proposed Development				
101	Bus Commuters (Consistent with the Local Area Census Data)				
49	Total Additional Bus Commuters Between 7am and 9am Due to Development				

BUS CAPACITY & DEMAND

- 3.3 Based on existing travel patterns in the locality, the above confirms that the Development will create an additional worst-case demand for approximately **49 seats on bus services** between 7am & 9am (applying the census data to the new residents).
- 3.4 The predicted increased service demand should be considered in terms of the seating capacity locally for existing Buses.
- 3.5 An observation survey of occupancy was commissioned of the local buses on Tuesday 1st October 2024, when schools and colleges are fully open.
- 3.6 The average occupancy of the buses observed, during the 7am-9am AM peak, was approximately 41% capacity. Therefore, it is clear that there is more than adequate existing capacity on the existing local bus services.
- 3.7 In terms of **Buses**, the overall demand is illustrated in **Table 2.4** below - with c.8,326 bus seats available during the weekday AM commuter peak period, all within an 5-6 minute walk of the subject site. There are a similar number of services and seats during the weekday PM Peak period 4pm-6pm, however demand is greater during the weekday AM Peak (due to 'peak spreading' that occurs in the evenings, with much more significant staggered departure times from work or College locations during evenings).

Table 2.4; Total Peak Demand for Bus Seats Due to Development

Details	Buses	People/Seats
Total Number of Buses (7-9am) All Routes	94	8326
Total Demand for Seats Created by Proposed Development (7-9am)		49
Percentage Impact Upon Existing Services Adjacent Site (All Routes)		0.6%

- 3.8 The resulting increased demand for bus seats is less than 0.6% of the total available seat capacity locally. This is considered negligible, and we believe it can easily be accommodated within the current service provision.
- 3.9 We conclude that this very small additional demand for Bus services can easily be accommodated within the existing services. There will also be more than adequate capacity on the further improved services locally.
- 3.10 The analysis is based on CSO travel patterns, and whilst the development seeks to encourage modal shift, given the small increase in predicted bus demand, any possible future changes in demand due to improve active travel & modal shift (walking, cycling, increased working from home and public transport etc) will still have negligible impact on bus capacity here.

4.0 CONCLUSIONS

- 4.1 NRB Consulting Engineers Ltd were appointed to address the Public Transport demand and capacity associated with a ‘Large-Scale Residential Development’ (LRD) at a site in Galway Port at Dock Road and Lough Atalia Road, Galway City.
- 4.2 The proposed residential development will comprise 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9m²); 2 No. café/restaurant units (totalling 428.4m²) and 1 No. retail unit (156.0m²).
- 4.3 The analysis of the existing and future Bus services has been undertaken based on an assessment methodology which includes trip generation assessment, modal split assumptions, and assignment/distribution. These assumptions have been based on real data extracted from the Central Statistics Office (CSO) Local Area Map Data, available through the CSO online mapping tool. This data was used to quantify the anticipated demand for Bus as a result of the proposed development in this particular location, utilising current local modal shift patterns & statistics for the adjacent Small Area.
- 4.4 This Report contains details of current and future Bus Services and Capacity serving the site and the local area.
- 4.5 The assessment confirms that the completion and full occupation of the development will result in an increased demand for Bus seats, with an additional 49 Bus customers during the weekday AM Commuter Peak 7-9am (and less during the PM Commuter peak period). This represents a total of less than 0.6% of the Bus seating capacity available locally during this AM Period.
- 4.6 We conclude that the additional demand for Public Transport trips as a result of the proposed development can be accommodated on the existing and future improved services in the area without any noticeable effect.
- 4.7 Whilst this Report contains an assessment of current capacity, it should be remembered that service providers are commercial in nature, running their businesses based on existing demand, rather than medium to longer term future demand. Bus services are provided based on real demand rather than potential demand. If there is an increased demand for services, or indeed if there is a deficit in a service provision, Operators generally react to improve facilities if it makes commercial sense to do so. More customers means more revenue generated.

Subject: RE: Stage 1 Pre-Consultation Meeting - Galway Port

Brian,

There is no update. At the time I advised that we would consider any proposal submitted in the context of the CDP standards and in the context of the overall application. I note that this concept 0.1 ratio is consistent with CDP standards which are maximums.

It is of course a matter for your client to consider carefully the value and cost of doing the necessary design review.

Is mise le Meas

Hi Theo,

Thanks for the call on the 15th November. Just checking if there was any update regarding the GCC car parking ratio opinion.

Regards,

Brian

Subject: RE: Galway Harbour - LDA Proposals

Hi Jarlath,

Just to confirm our discussion today: you advised that there are currently no formal Galway City Council (GCC) proposals or drawings for Lough Atalia Road in the vicinity of our site. You also noted that while there are preliminary discussions regarding a future route, our proposed Toucan Crossing will not impact or prevent GCC from advancing their own Active Travel proposals in due course.

Regards,

Brian McMahon

Please Note, the NRB office will be shut for 2 weeks from close of business on Friday 18th July until start of business Tuesday 5th August 2025. Emails and phone calls will not be monitored, reviewed or responded to during this time. We will get back to any queries in due course upon our return.

Subject: Galway Harbour - LDA Proposals

Hi Jarlath,

We were appointed to address the Traffic/Transportation issues associated with a mixed-use development proposed by the Land Development Agency (LDA) for a Residential Development on lands at Lough Atalia Road, Galway Port, Galway City. The scheme includes 356 Apartment units. The scheme is located here - <https://maps.app.goo.gl/n1RQYEQV6zegdoHG9>

I've copied Theo McLoughlin into this email, as I've spoken to Theo previously about this scheme.

While we are not leading on the design (the road layout is currently being developed), it is currently proposed to provide a Toucan Crossing on Lough Atalia Road with improvements to the access road (to the west of the existing

petrol station), as shown on the attached drawing. Therefore, our proposals could integrate with a future cycle route on Lough Atalia Road, without hindering its development by GCC.

Could you please advise if there any plans to upgrade the pedestrian or cycle infrastructure on the Lough Atalia Road which would link to our site / the wider Galway Harbour Masterplan, and which may have implications for our proposals?

Please note that the LDA in partnership with GHC have launched a joint consultation and stakeholder engagement process for the planned redevelopment of Galway Inner Harbour and Phase 1 - Amharc Atalia. www.galway-harbour.com

I'm happy to discuss the project if you wish to give me a call. Thanks.

Regards,

Brian McMahon

APPENDIX Q

Construction Traffic Management Plan

consulting
engineers

NRB

Outline

**Construction Traffic
Management Plan**

For

**Proposed Large Scale
Residential Development
(LRD)**

at

**Galway Port,
Galway City.**

PLANNING STAGE

1.0 INTRODUCTION

This Preliminary Construction Traffic Management Plan includes a description of the proposed construction works and how the traffic will be managed for the duration of the demolition and construction works on site. The methodology set out in this report, follows the methodology as will be set out in the Site Specific Construction Stage Management Plan which will be prepared and submitted when a Contractor is appointed for the works.

When the contractor is appointed to undertake all site clearance, they will prepare a detailed method statement having regard to their own operating procedures, the agreed construction programme, site conditions, and any relevant planning conditions that GCC may apply in the event of a grant of planning permission.

In addition to the Contractors Construction Stage Management Plan, any works on the public road (e.g. for services connections) will require an application for a Road Opening Licence and will be submitted by the contractor to the Local Authority. Any such application will include a full detailed Construction Traffic Management Plan prepared in accordance with Chapter 8 of the Traffic Signs Manual for pre-approval by the Local Authority. This CTMP Report should be considered Preliminary in these terms.

It should be noted that the issues covered within this document are preliminary in nature and may be amended or added to by the appointed contractor for the works.

2.0 PROJECT DESCRIPTION

The proposed development principally consists of: the demolition of the existing office / bus depot building (370.2m^2) and ancillary building (26m^2); the partial demolition of the existing ESB sub-station (67.4 m^2); the demolition of existing boundary walls at the south-west and north-west; and the construction of a LRD development.

The proposed LRD development primarily comprises: 356 No. residential apartments (172 No. 1-bed, 169 No. 2-bed and 15 No. 3-bed); crèche (255.9m^2); 2 No. café/restaurant units (totalling 428.4 m^2) and 1 No. retail unit (156.0 m^2). The development has a total floor area of $32,096.0\text{ m}^2$ and is primarily proposed in 4 No. blocks (identified as A–D) that generally range in height from 6 No. to 13 No. storeys.

The proposed development also includes: new internal street and pedestrian network, including a one-way vehicular route at the north-western side of the site and new junctions with Dock Road at the south-west and with the access road from Lough Atalia at the north-west; upgrades to Lough Atalia Road and the access road from it at the north-west of the site, including the provision of a new toucan pedestrian/cycle crossing at Lough Atalia Road; upgrades to the footpath and road interface with Dock Road to the south-west.

3.0 CONSTRUCTION PROGRAMME & PHASING

The Proposed Development will be executed in three distinct phases to facilitate a staged completion and occupation. The proposed sequence of construction outlined below is subject to confirmation once the building contract has been awarded and on completion of the Detailed Construction Management Plan, for agreement with GCC.

The duration of the demolition phase is anticipated to span approximately 3 months, and the overall construction phase is anticipated to span approximately 27 months, starting with Blocks A and B, followed by Blocks C and D.

Demolition Phase (Approximately 3 months):

- Demolition of the existing office / bus depot building (370.2m^2) and ancillary building (26.0m^2);
- Partial demolition of the existing ESB sub-station and ancillary building (67.4m^2); and
- Demolition of existing boundary walls at the south-west and north-west of the site.

Construction Phase 1 (Approximately 15 months):

- Construction of Blocks A and B (186 no. units);
- Road works along Dock Road;
- New internal street and parking court;
- Upgrade of road adjacent to petrol filling station;
- Installation of toucan crossing and associated footpath; and
- Landscaping around public square, courtyard and Lough Atalia Walk.

Construction Phase 2 (Approximately 12 months):

- Construction of Blocks C and D (170 no. residential units); and
- Completion of landscaping, including the remainder of Lough Atalia Walk.

It is anticipated that the proposed development will be constructed in phases with a 30 month construction duration.

The proposed phasing plan can be seen in Figure 3.1 below.

Figure 3.1 – Proposed Phasing

4.0 SERVICE DIVERSIONS & DEMOLITION

The application site involves a site of 1.621 Ha in Galway Port at Dock Road and Lough Atalia Road, Galway City. The proposed development consists of the demolition of the existing office / bus depot building (370.2m^2) and ancillary building (26.0m^2); the partial demolition of the existing ESB sub-station and ancillary building (67.4m^2); the demolition of existing boundary walls at the south-west and north-west; and the construction of a mixed-use development.

A ground penetrating radar survey will be carried out to establish the location of any potential services. Any existing piped or cabled underground services will be verified on site and will be made safe within the boundary of the site.

There is some demolition and removal of existing site contents and landscaping, and this work will be carried out in accordance with a programme and construction-stage Health/Safety Plan to be prepared by the successful demolition contractor.

5.0 SITE ESTABLISHMENT

The site fronts directly onto an access road located approximately 50 m from Lough Atalia Road, which is a wide single carriageway 2-way road. Construction access to the site will be from Lough Atalia Road.

The first activity to be carried out at the site will be the establishment of site facilities and security. It is anticipated that site establishment works will take approximately four weeks. The site office and welfare facilities will be confirmed in advance of the commencement of site works and agreed with Galway City Council. **Figure 3.1** shows the proposed locations of the site compound and staff parking.

All of the sub-contractors as well as the main contractor and project managers will occupy offices within the construction compounds. The site parking for all staff, contractors and visitors will also be located in this area.

The above image shows the proposed site compounds located to the north of the site, close to Lough Atalia Road, which allows easy delivery of construction materials.

6.0 PERIMETER HOARDING

Perimeter hoarding will be provided around the entire site to provide a barrier against unauthorised access from public areas. All areas of construction will be fenced / hoarded off to prevent unauthorized access. This fencing shall remain closed at all times during construction works and closed and locked after construction work hours / break times.

This fencing shall be erected in accordance with good practice and the Construction Regulations 2013. Fencing arrangements shall be reviewed as the life of the project progresses.

Access/Egress to site for site operatives and visitors shall be via biometric gates. Site security fencing/ Hoarding up to a height of 2.4m will be erected in line with the Construction Regulations 2013 that will clearly separate the work site from the surrounding public. It is not envisaged that the fencing will impinge upon the safe passage of pedestrians during the construction phase.

7.0 HOURS OF OPERATION

The site and building works required to implement the development shall only be carried out between the hours of:

- Mondays to Fridays - 7.00am to 7.00pm
- Saturday - 9.00 a.m. to 1.00pm
- Sundays and Public Holidays - No activity on site.

Deviation from these times will only be allowed in exceptional circumstances where prior written approval has been received from GCC. Such approval may be given subject to conditions pertaining to the particular circumstances being set by GCC.

The construction shift times, will ensure that any construction traffic will have an insignificant impact upon the traditional peak commuter traffic periods as it is envisaged that most construction workers will be at work before 8am in the morning and will leave after 6pm.

8.0 CONTROL OF NOISE AND DUST

The main contractor will obtain the necessary construction noise limits from any associated contract documentation, and will adhere to any limitations imposed by way of normally applied planning condition. However, the noise from any demolition operations will be minimised. Noise levels will comply with BS5228-1; 2009 Code of Practice for Noise & vibration Control on Construction and Open Sites: Vibration; Environmental Protection Agency Act 1992 Sections 106-108, any specific Local Authority requirements and Safety, Health & Welfare at Work (Control of Noise at Work) Regulations 2006 SI 371 (2006).

With specific reference to fears that may arise in terms of rock breaking and associated noise, if rock were to be encountered, the rock can be broken out using what's called "chemical fracturing". This is a process by which holes are drilled in the rock and chemicals inserted which expand and fracture the rock. There is virtually no noise or vibration from the process apart from drilling the rock itself which is not a significant noise nuisance.

The main contractor will ensure that any dust caused by the construction activities will be kept to a minimum as required in accordance with normal and best practice for construction in urban areas. Dust generated from construction operations will be controlled by water spray where required. In order to control the dust on site, the Main Contractor will be required to ensure the following conditions are adhered to:

- Dust suppression equipment shall be used on drilling and cutting machines,

- All loaded vehicles will be adequately covered before entering/leaving the site,
- Use of off-site fabrication to minimise dust generation on site.

Furthermore, in order to protect the surrounding area from dust deposition, mitigation measures are proposed and included in the accompanying CEMP (DNV, 2025):

9.0 COMMUNICATON

The main contractor will engage with adjoining sites to keep them informed of proposals for site establishment & compound, start dates, timing for vehicular movements associated with the works and an outline programme. Contact details for a senior member of the Site Management will be provided to allow any queries or issues to be promptly addressed in a proactive manner.

10.0 TRAFFIC MANAGEMENT PLAN/CONSTRUCTION TRAFFIC

Site Access

Traffic management will be undertaken for the site works in accordance with the principles outlined below and shall comply at all times with the requirements of:

- Department of Transport Traffic Signs Manual 2010 – Chapter 8 Temporary Traffic Measures and Signs for Roadworks
- Department of Transport Guidance for the Control and Management of Traffic at Road Works (2010)
- Any additional requirements detailed in Design Manual for Urban Roads & Streets (DMURS)

All construction materials (incoming and outgoing) will arrive and depart to/from Lough Atalia Road. During and demolition / site clearance, and for the duration of construction, all traffic will enter and leave via the Lough Atalia Road. Advanced warning signs will be placed at sufficient distances to taper off the entry and exit points. Pedestrian marshals will be used as and when required

Any long duration parking of delivery vehicles will not be permitted on the adjoining roads and in this regard, it is proposed that all deliveries and removals from the site will be off peak, managed and marshalled to minimise the risk of conflicting with other traffic movements on the local streets.

Unfettered and unobstructed access will be maintained at all times to neighbouring properties adjacent the site, and no vehicle will be left unattended, meaning that they will be moved immediately upon request.

Access to the site will be controlled and a person in a high-visibility jacket will be designated to assist construction vehicles to enter/exit the site at busy times to avoid conflict between pedestrian movements, main road traffic on Lough Atalia Road, and construction activities.

Approved traffic mitigation measures requested by GCC will be submitted with the updated CEMP, prior to the commencement of works.

Construction Traffic Routing

The proposed construction vehicle routes for the site will require a traffic management plan to be agreed upon with GCC and TII prior to site workings beginning. Two-way traffic will be maintained throughout the project.

All construction traffic will be required to use the primary roads in the vicinity of the site.

The route for any HGVs will depend on the location from where concrete & other materials will be sourced and the end destination for surplus demolition and excavation materials not reused on site. The locations of selected concrete batching plants and suitable waste recovery/waste disposal facilities have yet to be determined and will be identified when the contractor is appointed and when more detail on the material to be handled becomes available.

Although none are envisaged at this stage, the routes for any oversized construction vehicles required will be agreed with the Local Authority before commencement of works on site.

Construction Parking

Staff will be encouraged to walk, cycle and use public transport. All of the sub-contractors as well as the main contractor and project managers will occupy offices within the construction compounds. The site parking for all staff, contractors and visitors will also be located in this area.

Vehicle Movement During Construction

Excavated/demolished material will be removed off-site for recovery at an authorised facility in accordance with the waste hierarchy and relevant waste legislation. Transportation of the material will be by licensed hauliers. It is expected that there will be minimal and unnoticeable impact on the local roads.

11.0 MITIGATION MEASURES

Construction vehicle movements would be minimised through:

- Consolidation of delivery loads to/from the site and managing larger deliveries to occur outside peak periods,
- Use of precast/prefabricated materials where possible,
- Adequate storage space on site will be provided as set out above,
- A 'just in time' approach to deliveries to avoid potential conflicts and unnecessary storage & handling.

The Contractor will adhere to best practice mobility management measures for the site staff to encourage access to the site by means other than the private car. This will be considered by the Contractor prior to works commencing on site.

On-Site Accommodation

On site accommodation will consist of:

- Staff welfare facilities
- Adequate materials drop-off and storage area
- The site offices will have integrated welfare facilities including toilet and kitchen facilities for staff.

12.0 PUBLIC ROAD MAINTENANCE

The following measures will be implemented as required to ensure that surroundings are kept clean and tidy:

- It is proposed that a pre and post commencement condition survey and photographic record of the roads and footpaths will be undertaken in consultation between the appointed Contractor and Local Authority,
- A regular programme of site tidying will be established to ensure a safe and orderly site,
- Scaffolding will have debris netting attached to prevent materials and equipment being scattered by the wind,
- Food waste will be strictly controlled on all parts of the site,
- Any spillages on roads & footpaths outside the site will be cleaned regularly and not be allowed to accumulate,
- Wheel-checking and wheel-cleaning facilities will be provided for vehicles exiting the site,

- In the unlikely event of any solid waste being deposited on the public roads or road gullies any such waste will be removed and disposed of immediately.
- In the event of unintentional damage to road markings or road signage, these will be remediated to the satisfaction of the Local Authority.
- 'Site Entrance Ahead' Signage will be provided on the approaches to the site.

Any works on the public road will require an application for a Road Opening Licence submitted by the contractor to the Local Authority which will include a full detailed Traffic Management Plan prepared in accordance with Chapter 8 of the Traffic Signs Manual for approval by the Local Authority.

APPENDIX R

GoCar Letter of Support

NRB Consulting Engineers Ltd
5th Floor
40 Mespil Road
Dublin 4
D04 C2N4

5th September 2025

To Whom It May Concern,

This is a letter to confirm that GoCar intends to provide a car sharing services in the Galway Port area at Dock Road and Lough Atalia Road, Galway City. This large scale residential development located at the above locations has been discussed with GoCar representatives and with representatives of NRB and GoCar and are excited to provide 5 car sharing spaces to service this location. The development consists of approx. 350 unit dwellings. The developer proposes to have available five (5) vehicles within the development.

GoCar is Ireland's leading car sharing service with over 60,000 members and over 1200 cars and vans on fleet. Each GoCar which is placed in a community has the potential to replace the journeys of up to 15 private cars. The Department of Housing's Design Standards for New Apartments - Guidelines for Planning Authorities 2018 outline: "For all types of location, where it is sought to eliminate or reduce car parking provision, it is necessary to ensure... provision is also to be made for alternative mobility solutions including facilities for car sharing club vehicles."

Carsharing is a sustainable service. By allowing multiple people to use the same vehicle at different times, car sharing reduces car ownership, car dependency, congestion, noise, and air pollution. It frees up land which would otherwise be used for additional parking spaces. Most GoCar users only use a car when necessary and walk and use public transport more often than car owners.

By having GoCar car sharing vehicles in a development such as this, the residents therein will have access to pay-as-you go driving, in close proximity to their homes, which will increase usership of the service.

I trust that this information is satisfactory. For any queries, please do not hesitate to contact me.
